

****CAUTION** ONE-PIECE LAP INSTRUMENTS PRESENT A SAFETY RISK TO PATIENTS**

NEW PRODUCT: Laparoscopic Olsen Cholangiogram Forceps

(Single-Use / Disposable)

- First & only single-use design that 100% eliminates risk of cross-infection
- Replaces reusable one-piece version which raises the risk of cross-infection due to cleaning issues
- Utilized during lap chole procedure when your surgeon needs to perform cholangiography

Unique German engineered single-use Cholangiogram Forceps function exactly like the reusable version.

Very simple conversion no training required for surgeons.

After breaking open one-piece reusable Cholangiogram Forceps that have been in circulation, we found soil & debris 12 out of 12 times.
